RE: New source

Laboratory Work Order No.: 3101699

Legend Technical Services of Arizona, Inc. is pleased to provide the enclosed analytical results for the aforementioned project. These results relate only to the items tested. This cover letter and the accompanying pages represent the full report for these analyses and should only be reproduced in full. Samples for this project were received by the laboratory on 10/18/13 11:48.

The samples were processed in accordance with the Chain of Custody document and the results presented relate only to the samples tested. The Chain of Custody is considered part of this report.

All samples will be retained by LEGEND for 30 days from the date of this report and then discarded unless other arrangements are made.

This entire report was reviewed and approved for release by the undersigned. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

LEGEND TECHNICAL SERVICES OF ARIZONA, INC.

DRAFT REPORT
DATA SUBJECT TO CHANGE
(602) 324-6100

This laboratory report is confidential and is intended for the sole use of LEGEND and it's client.

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Type	Date Sampled	Date Received
DRAFT: Hamp Well #3 (Z1,975)	3101699-01	Drinking Water	Grab	10/17/13 15:00	10/18/13 11:48
DRAFT: Travel Blank	3101699-02	DI Water	Grab	10/18/13 00:00	10/18/13 11:48

Sample Condition Upon Receipt:

Temperature: 4.40 C

All samples were received in acceptable condition unless noted otherwise in the case narrative.

Case Narrative:

Holding Times: All holding times were met unless otherwise qualified.

QA/QC Criteria: All analyses met method requirements unless otherwise qualified.

Certifications: AZ(PHX)0004, AZ(TUC)0004, AIHA#102982, CDC ELITE Member.

Accreditation is applicable only to the test methods specified on each scope of accreditation held by LEGEND.

Comments: There were no problems encountered during the processing of the samples, unless otherwise noted.
All samples were analyzed on a "wet" basis unless designated as "dry weight".

Client notified of the result via email by the micro analyst on 10/20/13 LP

Sample was turbid resulting in apparent color. In order to attempt to record the true color, the sample was centrifuged at 4500 rpm for 10 minutes. This resulted in a pellet at the bottom of the sample. The supernatant was poured off, but the sample remained very turbid. This centrifugation process was run again, resulting in another smaller pellet. The sample remained visibly turbid. The color analysis was run from the supernatant of the second centrifugation; however the result is still "apparent" color due to the turbidity. CL 10/22/13

FORM GEN-170 (05/06)

ED 005149 00023106-00009

3101699

T = 1,100 to T = 2,000, every 15 minutes.
T = 2,000 to T = 3,000, every 30 minutes.

If the pump is shut off for any reason during the pumping portion of the test, it shall remain shut off for 24 hours and the complete test shall be rerun.

The pump must remain in place until all recovery measurements are completed.

Upon completion of the test, recorded measurements shall be turned over to Project Engineer for analysis.

2.14 WATER QUALITY TESTING

Near the end of the constant-rate test, the Contractor will collect and properly preserve a suite of water samples. The laboratory listed below will provide appropriate sample containers. Analyses for the chemical constituents listed below shall be performed at the Contractor's expense and the results given to the Project Engineer.

Water quality analysis and methods are based on the National Primary Drinking Water Regulations as found in the Code of Federal Regulations (CFR) Title 40 Part 141. A summary of the National Primary Drinking Water Regulations are attached as Appendix E.

The water quality testing laboratory shall be EPA certified. The water quality testing shall be performed by Legend Technical Services, Inc., 17631 North 25th Avenue, Phoenix, AZ 85023, Phone: (602) 324-6100 or approved equal. When contacting Legend Technical Services the Contractor shall request sample containers for a "new source approval" test for groundwater. As the well is a "new source", there is no need to test for disinfectants or disinfection byproducts.

The "new source approval" test from Legend Technical Services shall comply with the most recent version of the National Primary Drinking Water Regulations and shall test for the following general classes of contaminants:

1. Microorganisms
2. Organic Chemicals
3. Inorganic Chemicals
4. Radionuclides

- 39 -

3101699

The Contractor shall also sample and test for the following secondary parameters to determine water chemistry that may lead to customer complaints or operation and maintenance problems:

1. Alkalinity
2. Aluminum
3. Calcium
4. Chloride
5. ~~Color~~
6. Copper
7. Corrosivity
8. Flouride
9. Hardness as CaCO3
10. Iron
11. Magnesium
12. Manganese
13. Nickel
14. ~~Odor~~
15. pH
16. Silver
17. Sodium
18. Sulfate
19. Total Dissolved Solids (TDS)
20. Total Organic Carbon (TOC)
21. Zinc
22. Silica

+ Potassium
+ bicarbonate

Potassium?

Sample analysis (both acquisition and payment) shall be the sole responsibility of the Contractor. The Project Engineer shall be present during water sampling and shall initial the custody seals of the sample containers.
